Special Issue

The Non-equilibrium Thermodynamic Foundations of Fundamental Problems from Nature

Message from the Guest Editor

This Special Issue reviews the progress that has been made in these difficult fields through applying non-equilibrium thermodynamic formalism to these unresolved problems. Each review will be written in simple language for the non-expert, thereby allowing the utility of the non-equilibrium framework to be appreciated by those with little background in non-equilibrium thermodynamics and bringing wider recognition to your novel perspective on the problem. Keywords:

- non-equilibrium thermodynamics
- Big Bang
- dark energy
- cosmology
- particle-antiparticle asymmetry
- origin of life
- homochirality
- meaning of time
- origin of complexity
- cancer
- the second law of thermodynamics

Guest Editor

Dr. Karo Michaelian

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Martin Bohner

Department of Mathematics and Statistics, Missouri University of Science and Technology, Rolla, MO 65409, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 32.9 days after submission; acceptance to publication is undertaken in 7.7 days (median values for papers published in this journal in the second half of 2024).

Recognition of Reviewers:

APC discount vouchers, optional signed peer review, and reviewer names published annually in the journal.
