Fractal Dimensions and Their Implications in Characterization of Porous Media

Message from the Guest Editors

Porous media widely exist in nature, such as soils, pores, and fractures in oil, coal, and water reservoirs, as well as in engineering materials like fibrous materials, ceramic materials, construction materials, thermal insulation materials, biological tissue, and biological materials. It has been shown that the microstructures of the above media/materials exhibit fractal characteristics, and the fractal dimensions are the most important parameters among their microstructures.

About the Journal

Message from the Editor-in-Chief

Fractal and Fractional (*Fractal Fract.*) is a scholarly online journal which provides a forum for discussion on new original models and methods in fractals and fractional calculus both from theory and applications. It is a peer-reviewed, open access journal that publishes high quality original research articles, review papers and short communications.

Editor-in-Chief

Prof. Dr. Carlo Cattani

Engineering School (DEIM), University of Tuscia, Largo dell'Università,
01100 Viterbo, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

Journal Rank:

JCR - Q1 (Mathematics, Interdisciplinary Applications) /
CiteScore - Q1 (Analysis)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.3 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
