

## Special Issue

# Fractal Antennas for Wearable Applications

### Message from the Guest Editors

We are pleased to announce a Special Issue, entitled "Fractal Antennas for Wearable Applications", in *Fractal Fract*. This Special Issue aims to gather cutting-edge research on the theory, design, implementation, and application of fractal antennas specifically tailored for wearable devices. Fractal antennas offer unique advantages for wearable applications, such as their compact size, multiband operation, and robust performance in challenging environments. They have the potential to revolutionize wireless communication and sensing capabilities in wearable devices, enabling seamless integration into clothing, accessories, and even implantable devices. We invite researchers to submit their original contributions on various aspects of fractal antennas for wearable applications.

### Guest Editors

Dr. Youcef Braham Chaouche

## About the Journal

### Message from the Editor-in-Chief

*Fractal and Fractional* (*Fractal Fract.*) is a scholarly online journal which provides a forum for discussion on new original models and methods in fractals and fractional calculus both from theory and applications. It is a peer-reviewed, open access journal that publishes high quality original research articles, review papers and short communications.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

#### Journal Rank:

JCR - Q1 (Mathematics, Interdisciplinary Applications) /  
CiteScore - Q1 (Analysis)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.9 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
