Enhancing Pain Assessment and Anesthesia Management: Fractional Modeling with AI

Message from the Guest Editor

The integration of fractional calculus and AI in healthcare holds great potential for numerous areas, including anesthesia, hemodynamic monitoring, epilepsy monitoring, and pain management. By combining these concepts, healthcare professionals can benefit from more accurate monitoring, prediction, and intervention, ultimately leading to improved patient outcomes. Possible topics that qualify for this are (but not limited to): Fractional calculus and AI in monitoring for anesthesia Hemodynamic monitoring optimized with fractional calculus and AI Integration of fractional calculus and AI in monitoring for epilepsy Pain monitoring and fractional calculus combined with AI.

About the Journal

Message from the Editor-in-Chief

Fractal and Fractional (*Fractal Fract.*) is a scholarly online journal which provides a forum for discussion on new original models and methods in fractals and fractional calculus both from theory and applications. It is a peer-reviewed, open access journal that publishes high quality original research articles, review papers and short communications.

Editor-in-Chief

Prof. Dr. Carlo Cattani
Engineering School (DEIM), University of Tuscia, Largo dell'Università,
01100 Viterbo, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

Journal Rank:

JCR - Q1 (Mathematics, Interdisciplinary Applications) /
CiteScore - Q1 (Analysis)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.3 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
