

## Special Issue

# Transport Phenomena in Porous Media and Fractal Geometry

### Message from the Guest Editors

Heat and mass transport in porous media have been found to serve in a large number of practical applications. It is, however, notoriously difficult to characterize the transport accurately, mainly due to the highly complicated structure of porous media. Various numerical methods have been recently developed. Although numerical implementations differ from case to case, they can hardly reveal the physics involved during the transport clearly or provide generalized formulation consequently, leading to the requirement of analytical analysis. On the other hand, microstructures of most of the natural- and artificial porous media have been found to follow the fractal geometry, enabling analytical analysis of the complicated structure of porous media with the fractal theory. Once the microstructures have been characterized, the transport properties, such as permeability, thermal conductivity, diffusion coefficient, can be quantified as a consequence. The Special Issue concentrates on the state of the art in fractal-based method on transport in porous media, combined with other recent experiments and numerical simulations, offering a more-in-depth insight.

## About the Journal

### Message from the Editor-in-Chief

*Fractal and Fractional* (*Fractal Fract.*) is a scholarly online journal which provides a forum for discussion on new original models and methods in fractals and fractional calculus both from theory and applications. It is a peer-reviewed, open access journal that publishes high quality original research articles, review papers and short communications.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

#### Journal Rank:

JCR - Q1 (Mathematics, Interdisciplinary Applications) /  
CiteScore - Q1 (Analysis)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.3 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
