

Special Issue

New Trends on Fixed Point Theory

Message from the Guest Editors

The fixed point theory occupies an important place in the nonlinear functional analysis, numerical mathematics, economics as well as in applied sciences. This Special Issue is dedicated to the modern theory of a fixed point from two aspects: metric and topological. Additionally, we expect applications in fractional differential equations, fractional differential inclusions, fractional boundary value problems and fractional operators. In this Special Issue, we hope to publish papers showing aspects of the application of topological methods in the fixed point theory, focusing primarily on Schauder-type theorems for single-valued mappings. The final goal is to publish novel results concerning multivalued mappings (Kakutani-type theorems). This primarily refers to applications in mathematical economics (the existence of a maximal element and the equilibrium problem).

Guest Editors

Dr. Zoran D. Mitrovic

Dr. Reny Kunnel Chacko George

Dr. Liliana Guran

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Carlo Cattani
Engineering School (DEIM), University of Tuscia, Largo dell'Università,
01100 Viterbo, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

Journal Rank:

JCR - Q1 (Mathematics, Interdisciplinary Applications) /
CiteScore - Q1 (Analysis)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 23.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2024).
