

Special Issue

Recent Advances in Biofuel Production from Biowaste/Biomass-Based Residues

Message from the Guest Editor

In this context, this Special Issue of *Fuels* “Recent Advances in Biofuel Production from Biowaste/Biomass-Based Residues”, will cover a variety of topics to advance research into thermal conversion technologies. Topics of interest include, but are not limited to, the following areas:

- Biowaste thermochemical conversion process;
- Biomass co-carbonization process;
- Biochar from protein-rich biomass;
- Kinetic and thermal studies of lignocellulosic waste;
- Fuel production from biowastes;
- Organic wastes as gasification products;
- Biooil production and characterization from biowastes;
- Carbonization technology to energy storage;
- Biochar (black gold) in promoting circular economy in the agricultural sector;
- Recent advances in the development and applications of protein-rich waste biomass-derived carbons;
- Biochar from organic wastes and its use as an environmental tool.

We look forward to receiving your contributions [...] for further reading, please follow the link to the Special Issue Website

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Badie Morsi

Swanson School of Engineering, University of Pittsburgh, 940 Benedum Hall, 3700 O'Hara Street, Pittsburgh, PA 15261, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO, Ei Compendex, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.8 days after submission; acceptance to publication is undertaken in 7.2 days (median values for papers published in this journal in the second half of 2025).
