

Special Issue

Renewable and Sustainable Biofuel Production: Technical, Economic and Environmental Aspects

Message from the Guest Editors

We are looking for contributions in the following areas:

- Technologies: novel/emerging technologies including but not limited to thermochemical, biochemical and (photo)electrochemical conversion.
- Tools/methods: multi-/interdisciplinary approaches are particularly welcome. Both computational modelling and experimental studies are welcome and should demonstrate a holistic assessment in terms of technical, economic and environmental dimensions. We also encourage research that demonstrates resource efficiency enhancement through process integration and intensification strategies. Studies based on purely experimental research without a holistic assessment are not within the scope of this Special Issue.
- Sustainability analysis: techno-economic analysis, life cycle assessment (LCA) and any other assessments of the novel/emerging production technologies will be considered.
- Case studies: local/regional/national/international case studies; small/large-scale systems; and policy recommendations are also welcome.

Guest Editors

Dr. Kok Siew Ng

Prof. Dr. Denny K. S. Ng

Dr. Anh N. Phan

Deadline for manuscript submissions

closed (31 July 2023)

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), EBSCO, Ei Compendex, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 24.7 days after submission; acceptance to publication is undertaken in 8.8 days (median values for papers published in this journal in the first half of 2025).
