Special Issue

Novel Energy Molecules and Drop-In Renewable Fuels for the Future Green Heavy-Duty Transport

Message from the Guest Editor

This Special Issue is encouraging researchers to address the technological advancements that have led to the development of novel approaches in the production of novel energy molecules and advanced renewable drop-in fuels. We are looking for contributions in the following areas: energy molecules for future heavy-duty transport, and advanced bio-, thermo-, and electro-chemical methods for the development of energy-carrying molecules, artificial intelligence and machine learning in novel fuel production processes, life cycle analysis, sustainability, and distribution of new energy-carrying molecules for heavy-duty transport.

Guest Editor

Dr. Ulugbek Azimov

Department of Mechanical and Construction Engineering, Northumbria University, Newcastle upon Tyne NE1 8ST, UK

Deadline for manuscript submissions

closed (1 April 2024)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Badie Morsi
Swanson School of Engineering, University of Pittsburgh, 940 Benedum Hall, 3700 O'Hara Street, Pittsburgh, PA 15261, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), EBSCO, Ei Compendex, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 24.7 days after submission; acceptance to publication is undertaken in 8.8 days (median values for papers published in this journal in the first half of 2025).
