Blockchain and DLT Interoperability

Guest Editors:

Dr. Andrea Pinna
Department of Mathematics and Computer Science, University of Cagliari, 09124 Cagliari, Italy

Prof. Dr. Roberto Tonelli
Department of Mathematics and Computer Science, University of Cagliari, 09124 Cagliari, Italy

Dr. Leonardo Mostarda
Department of Computer Science, University of Camerino, 62032 Camerino, Italy

Deadline for manuscript submissions:
closed (28 February 2024)

Message from the Guest Editors

The purpose of this Special Issue is to stimulate and collect high-quality scientific papers related to the study of the problem of interoperability between blockchain and its solutions. The articles in this Special Issue are intended to serve as a resource for academics and industry in the development of new studies and blockchain applications. Topics include, but are not limited to:

- Best practices for blockchain interoperability by design;
- Performance metrics and tools for blockchain interoperability;
- Scalability solutions, sidechain systems and sharding systems;
- Blockchain–agnostic interoperability protocols;
- DLT and blockchain interoperability architectures;
- Blockchain reversibility;
- Layer 2 solutions for interoperability;
- Cross-chain transactions;
- Languages for interoperability;
- Blockchain-oriented software engineering;
- Blockchain oracles and bridges;
- Cross-chain decentralized applications;
- Applications of blockchain interoperability;
- Blockchain and DLT systems interaction.

Architecture, University of Parma,
Parco Area delle Scienze, 181/A,
43124 Parma, Italy

Message from the Editor-in-Chief

Future Internet is a fast-growing journal devoted to rapid publications of the latest results in the general areas of computer networking/communications and information systems, with a focus on the Internet of Things, big data and augmented intelligence, smart systems (in terms of technologies, architectures, and applications), network virtualization, edge/fog computing, and cybersecurity. Both theoretical and experimental papers are welcome. Every year, *Future Internet* also features Special Issues dedicated to specific topics within the journal's scope.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, Inspec, and other databases.
Journal Rank: JCR - Q2 (*Computer Science, Information Systems*) / CiteScore - Q1 (Computer Networks and Communications)
