Message from the Guest Editors

Dear Colleagues,

Big data is a term that has risen to prominence describing data that exceeds the processing capacity of conventional database systems. This Special Issue is an attempt to study big data and analytics in the era of extreme connectivity and automation that relies on technologies like IoT, big data connectivity, blockchain, named data networking and artificial intelligence.

- Big Data Automation
- Extreme Automation and Connectivity
- Blockchain
- Internet of Things
- Connected Data Analytics
- Named Data Networking

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Future Internet* (ISSN 1999-5903). *Future Internet* is an international, peer-reviewed, open access journal, which provides an advanced forum for scientific studies related to Internet technologies and the information society.

Future Internet is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, Inspec, and many other databases.

Journal Rank: CiteScore - Q2 (*Computer Networks and Communications*)
