RFID, though widely accepted as an exciting technology, presents several significant design challenges and issues to engineers and researchers. These issues arise from the context-aware processing of RFID data, achieving efficient matching and read range, developing novel smart IoT-based applications, achieving smart and human interaction, and privacy and security issue of RFID data within the IoT context.

## Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Future Internet* (ISSN 1999-5903). *Future Internet* is an international, peer-reviewed, open access journal, which provides an advanced forum for scientific studies related to Internet technologies and the information society.

*Future Internet* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:**—free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** Indexed in **Ei Compendex**, Scopus and the Emerging Sources Citation Index (ESCI - Web of Science), from Vol. 9.

**Rapid Publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 13.9 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2020).
