Covilhã, Portugal

Deadline for manuscript  
submissions:

**closed (20 March 2022)**

### Message from the Guest Editor

The aim of this Special Issue is to collect papers related to the design, implementation, deployment, operation, and evaluation of smart objects and technologies for social good. Social good includes products and services that benefit several people with special needs (e.g., older adults), the performance of sports, and young people.

These represent key issues in the implementation of different kinds of solutions in different fields, such as healthcare, safety, sports, environment, democracy, computer science, and human rights.

It is a wide field that is a very challenging subject for different research studies, requiring the integration of classical and innovative methodologies. It also promoted the combination of different knowledge from different sciences.

Both theoretical and application-oriented papers on various aspects of traditional and innovative medicine, intelligent systems and devices, distributed computing, artificial intelligence, data acquisition, data processing, diagnostic, preventive medicine, sensed devices, participatory medicine, big data, precision systems, automation, Internet of Things, and cyber-physical systems are invited.

an Open Access Journal by MDPI

## Editor-in-Chief

### **Prof. Dr. Gianluigi Ferrari**

Department of Engineering and  
Architecture, University of Parma,  
Parco Area delle Scienze, 181/A,  
43124 Parma, Italy

## Message from the Editor-in-Chief

*Future Internet* is a fast-growing journal devoted to rapid publications of the latest results in the general areas of computer networking/communications and information systems, with a focus on the Internet of Things, big data and augmented intelligence, smart systems (in terms of technologies, architectures, and applications), network virtualization, edge/fog computing, and cybersecurity. Both theoretical and experimental papers are welcome. Every year, *Future Internet* also features Special Issues dedicated to specific topics within the journal's scope.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, Inspec, and other databases.

**Journal Rank:** CiteScore - Q1 (*Computer Networks and Communications*)
