Message from the Guest Editor

Dear Colleagues,

Intelligent Transport Systems (ITS) are vital to increase safety and tackle World's growing emission and congestion problems. They can make transport safer, more efficient and more sustainable by applying various information and communication technologies to all modes of passenger and freight transport. Moreover, due to future internet developments, the integration of existing technologies can create new services. ITS are key to support jobs and growth in the mobility and transport sector. But in order to be effective, the roll-out of ITS needs to be coherent and properly coordinated across the countries with a strong connection among players.

ITS will be used to improve journeys and operations on specific and combined modes of transport. Universities, Governmental Commissions and Researchers also work to set the ground for the next generation of ITS solutions, through the deployment of Cooperative-ITS, paving the way for automation in the transport sector. C-ITS are systems that allow effective data exchange through wireless technologies so that vehicles can connect with each other, with the road infrastructure and with other road users.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Future Internet* (ISSN 1999-5903). *Future Internet* is an international, peer-reviewed, open access journal, which provides an advanced forum for scientific studies related to Internet technologies and the information society.

Future Internet is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: Indexed in **Ei Compendex**, Scopus and the Emerging Sources Citation Index (ESCI - Web of Science), from Vol. 9.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 17.1 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2019).
