submissions:

closed (30 November 2009)

Message from the Guest Editor

The term 'mashup' refers to Web sites or services that weave data from different sources into a new data source or service. Mashups are becoming increasingly widespread, e.g., in the context of combining geographic and geo-tagged data about health-related issues or some disease and displaying such integrated data on Web maps.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Future Internet* (ISSN 1999-5903). *Future Internet* is an international, peer-reviewed, open access journal, which provides an advanced forum for scientific studies related to Internet technologies and the information society.

Future Internet is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, Inspec, and other databases.

Journal Rank: CiteScore - Q2 (*Computer Networks and Communications*)
