

Special Issue

Selected Papers from Future Internet Editorial Board Members and Guest Editors

Message from the Guest Editors

We are pleased to announce a new *Future Internet* Special Issue that is quite different from our typical ones, which will mainly focus on either selected areas of research or special techniques. For this Special Issue, *Future Internet* is compiling a collection of papers submitted exclusively by its Editorial Board Members (EBMs) and (GEs) covering different areas of Internet technologies and the information society. The main idea behind this issue is to turn the tables and allow our readers to be the judges of our academic editors.

About the Journal

Message from the Editor-in-Chief

Future Internet is a fast-growing journal devoted to rapid publications of the latest results in the general areas of computer networking/communications and information systems, with a focus on the Internet of Things, big data and augmented intelligence, smart systems (in terms of technologies, architectures, and applications), network virtualization, edge/fog computing, and cybersecurity. Both theoretical and experimental papers are welcome. Every year, *Future Internet* also features Special Issues dedicated to specific topics within the journal's scope.
