Social Internet of Things (SloT)

Message from the Guest Editors

The Social Internet of Things (SloT) paradigm is a very promising interdisciplinary research and application field. It derives from the integration of concepts, ideas, and approaches coming from social networking and the Internet of Things. It can become one of the leading technologies of Society 5.0, similarly to how the IoT has been for Industry 4.0. Despite the important results already obtained, the SloT paradigm, as well as the most recent ones derived from it such as the MIoT (Multi-IoT paradigm), are still in their early stage. To enable the paradigm to reach its full potential, the contribution of disparate research fields (e.g., social network analysis, semantic web, fuzzy logic, Industry 4.0, Society 5.0, big data, smart data analytics, machine learning, deep learning, cybersecurity, distributed computing and cloud, eco-sustainable systems, and human-centered systems, just to cite a few) is compulsory.

About the Journal

Message from the Editor-in-Chief

Future Internet is a fast-growing journal devoted to rapid publications of the latest results in the general areas of computer networking/communications and information systems, with a focus on the Internet of Things, big data and augmented intelligence, smart systems (in terms of technologies, architectures, and applications), network virtualization, edge/fog computing, and cybersecurity. Both theoretical and experimental papers are welcome. Every year, *Future Internet* also features Special Issues dedicated to specific topics within the journal's scope.

Editor-in-Chief

Prof. Dr. Gianluigi Ferrari
Department of Engineering and Architecture, University of Parma,
Parco Area delle Scienze, 181/A, 43124 Parma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Information Systems) /
CiteScore - Q1 (Computer Networks and Communications)
