Curative Power of Medical Data 2020

Message from the Guest Editors

MEDA-2020 aims to gather innovative approaches for the exploitation of biomedical data using semantic web technologies and linked data by bringing together practitioners, researchers, and scholars to share examples, use cases, theories, and analysis of biomedical data. The main objective of this second edition workshop is to consolidate an internationally appreciated forum for scientific research in BioMed, with emphasis on crowdsourcing, semantic web, knowledge integration, and data linking. The scientific program of MEDA-2020 will focus around the following topics:

- Natural language processing/text mining
- Data science/applied mathematics
- Drug related knowledge discovery
- Genomic assays
- Reproducibility

Keywords:

- Medical NLP
- Bio NLP
- Text mining
- Natural language processing
- Data science
- Clinical Curation
- Drug knowledge discovery

About the Journal

Message from the Editor-in-Chief

Future Internet is a fast-growing journal devoted to rapid publications of the latest results in the general areas of computer networking/communications and information systems, with a focus on the Internet of Things, big data and augmented intelligence, smart systems (in terms of technologies, architectures, and applications), network virtualization, edge/fog computing, and cybersecurity. Both theoretical and experimental papers are welcome. Every year, *Future Internet* also features Special Issues dedicated to specific topics within the journal's scope.
