Special Issue

Selected Papers from the 9th Annual Conference "Comparative Media Studies in Today's World" (CMSTW'2021)

Message from the Guest Editor

This Special Issue of *Future Internet* features the best papers from the 9th annual conference of 'Comparative Media Studies in Today's World' (CMSTW'2021), which was held from April 20 to 21, 2021, in St. Petersburg, Russia (virtually). The scope of the conference was exploring the interplay between communication architectures and other features of online life. User talk is a major part of online communication today and may be seen as both the contents of platforms' 'communication vessels' and as a part of the communication architecture itself. The authors of this Special Issue explore how features of the communication structure and context relate to the content and discursive features of today's (and future) Internet discussions.

Prof. Dr. Svetlana S. Bodrunova

School of Journalism and Mass Communications, St. Petersburg State University, 199004 St. Petersburg, Russia

Deadline for manuscript submissions

closed (15 October 2021)

Future Internet

About the Journal

Message from the Editor-in-Chief

Future Internet is a fast-growing journal devoted to rapid publications of the latest results in the general areas of computer networking/communications and information systems, with a focus on the Internet of Things, big data and augmented intelligence, smart systems (in terms of technologies, architectures, and applications), network virtualization, edge/fog computing, and cybersecurity. Both theoretical and experimental papers are welcome. Every year, *Future Internet* also features Special Issues dedicated to specific topics within the journal's scope.

Editor-in-Chief

Prof. Dr. Gianluigi Ferrari
Department of Engineering and Architecture, University of Parma,
Parco Area delle Scienze, 181/A, 43124 Parma, Italy

Author Benefits

Open Access:
free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:
indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, Inspec, and other databases.

Journal Rank:
JCR - Q2 (Computer Science, Information Systems) / CiteScore - Q1 (Computer Networks and Communications)
