Cyberbullying Analysis in Higher Education

Message from the Guest Editors

Current globalization has resulted in Western societies with citizens of diverse religious and social characteristics. This diversity is transferred to the classroom, where inclusive education is shown to be the best way to advocate for the educational integration of students belonging to minority social groups. However, prejudice and intolerance often lead to conflict among students. Even in the most extreme situations, bullying or cyberbullying can occur through digital media. Cyberbullying also aggravates the situation of the victim, as texts written on the Internet are long in duration, reach a larger number of people, and are not only found in the school context. In this Issue we intend to address the cyberbullying phenomenon towards minority social groups in high school and in higher education, trying to understand continuity and discontinuity in the dynamics across these two developmental and educational contexts. Research stemming from different fields and perspectives is encouraged.

About the Journal

Message from the Editor-in-Chief

Future Internet is a fast-growing journal devoted to rapid publications of the latest results in the general areas of computer networking/communications and information systems, with a focus on the Internet of Things, big data and augmented intelligence, smart systems (in terms of technologies, architectures, and applications), network virtualization, edge/fog computing, and cybersecurity. Both theoretical and experimental papers are welcome. Every year, *Future Internet* also features Special Issues dedicated to specific topics within the journal's scope.

Editor-in-Chief

Prof. Dr. Gianluigi Ferrari
Department of Engineering and Architecture, University of Parma,
Parco Area delle Scienze, 181/A, 43124 Parma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Information Systems) /
CiteScore - Q1 (Computer Networks and Communications)
