

# Special Issue

## Modern Trends in Multi-Agent Systems

### Message from the Guest Editors

This special issue is dedicated to the analysis and the optimization of MASs from a wide point of view (including also branches potentially applicable in MASs); therefore, potential topics include but are not limited to the following:

- wireless networks
- Internet of Things
- distributed and parallel computing
- cloud computing
- data aggregation, sensor fusion
- signal processing
- modeling by the big data from the multi-sensor systems
- possibility theory
- remote sensing data processing
- artificial intelligence for the multi-sensor fusion systems
- routing protocols
- communication protocols
- optical systems

## About the Journal

### Message from the Editor-in-Chief

*Future Internet* is a fast-growing journal devoted to rapid publications of the latest results in the general areas of computer networking/communications and information systems, with a focus on the Internet of Things, big data and augmented intelligence, smart systems (in terms of technologies, architectures, and applications), network virtualization, edge/fog computing, and cybersecurity. Both theoretical and experimental papers are welcome. Every year, *Future Internet* also features Special Issues dedicated to specific topics within the journal's scope.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Computer Science, Information Systems) /  
CiteScore - Q1 (Computer Networks and Communications)
