

Special Issue

Multi-Clouds and Edge Computing

Message from the Guest Editors

The aim of this Special Issue is to gather the most recent innovations in cloud management platforms that support hybrid, multi-cloud and edge deployments to cope with the ever increasing challenges of the cloud computing continuum. Potential topics include, but are not limited to:

- Design and implementation of multi-cloud management platforms
- Applications and algorithms for big data and mobile edge computing multi-clouds
- Ontologies and languages for multi-cloud application modelling
- Advanced monitoring, event management systems and data lifecycle management in heterogeneous cloud and edge environments
- Cloud computing service selection models
- Optimization of distributed cloud computing (infrastructure and applications)
- Cloud and edge computing for streamed data and real-time control (processing or distribution)
- AI for scalability and QoS for multi-cloud big data applications
- Hybrid-Cloud High Performance Computing (HPC) applications

Guest Editors

Dr. Yiannis Verginadis

Dr. Geir Horn

Prof. Dr. Tamas Kiss

Dr. Dimitrios Kardaras

Deadline for manuscript submissions

closed (31 December 2021)

About the Journal

Message from the Editor-in-Chief

Future Internet is a fast-growing journal devoted to rapid publications of the latest results in the general areas of computer networking/communications and information systems, with a focus on the Internet of Things, big data and augmented intelligence, smart systems (in terms of technologies, architectures, and applications), network virtualization, edge/fog computing, and cybersecurity. Both theoretical and experimental papers are welcome. Every year, *Future Internet* also features Special Issues dedicated to specific topics within the journal's scope.

Editor-in-Chief

Prof. Dr. Gianluigi Ferrari
Department of Engineering and Architecture, University of Parma,
Parco Area delle Scienze, 181/A, 43124 Parma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Information Systems) /
CiteScore - Q1 (Computer Networks and Communications)
