

## Special Issue

# Scenarios for the Further Development and Impact of Blockchain Technologies

### Message from the Guest Editor

The focus of this Special Issue is the exploration of diverse scenarios that might arise from blockchain technologies, and not on the identification of the most likely development. Potential topics include, but are not limited to:

- Future developments of core blockchain technologies
- Use cases that can be created with blockchain technologies and how their successful deployment depends on external factors
- Extreme scenarios (both positive and negative) that may arise from the use of blockchain technologies
- Potential impact of blockchain on business/economy/society
- Identification of contingency factors that enable or hinder the acceptance and adoption of blockchain technologies

---

### Guest Editor

Prof. Dr. Horst Treiblmaier

Department of International Management, Modul University Vienna,  
1190 Vienna, Austria

---

### Deadline for manuscript submissions

closed (30 May 2022)

## About the Journal

### Message from the Editor-in-Chief

*Future Internet* is a fast-growing journal devoted to rapid publications of the latest results in the general areas of computer networking/communications and information systems, with a focus on the Internet of Things, big data and augmented intelligence, smart systems (in terms of technologies, architectures, and applications), network virtualization, edge/fog computing, and cybersecurity. Both theoretical and experimental papers are welcome. Every year, *Future Internet* also features Special Issues dedicated to specific topics within the journal's scope.
