Security Patterns in Industry

Message from the Guest Editor

Security patterns are widely considered to be a good way to build secure systems, but they are still rarely used in industry. It is not that security patterns are not used, it is just that they should be used more.

Security patterns are starting to be accepted, with some companies producing catalogs in books and in the web. We would like to hear from people using security patterns and find out their experiences with them. Another related question is: Do we have better alternatives?

Keywords

- Security patterns
- Software security
- Secure systems design
- Software patterns
- Software engineering

About the Journal

Message from the Editor-in-Chief

Future Internet is a fast-growing journal devoted to rapid publications of the latest results in the general areas of computer networking/communications and information systems, with a focus on the Internet of Things, big data and augmented intelligence, smart systems (in terms of technologies, architectures, and applications), network virtualization, edge/fog computing, and cybersecurity. Both theoretical and experimental papers are welcome. Every year, Future Internet also features Special Issues dedicated to specific topics within the journal's scope.

Editor-in-Chief

Prof. Dr. Gianluigi Ferrari

Department of Engineering and Architecture, University of Parma, Parco Area delle Scienze, 181/A, 43124 Parma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Computer Science, Information Systems) / CiteScore - Q1 (Computer Networks and Communications)
