

## Special Issue

# Unfolding Road-Related Aspects of Modern Infrastructure in the Future Era of Road Transport

### Message from the Guest Editors

The transportation sector is undergoing transformative changes driven by the integration of autonomous and electric vehicles into conventional vehicle fleets. These advancements aim to enhance road safety and promote environmental sustainability. At the same time, physical road infrastructure is increasingly challenged by climatic events, evolving land use patterns, and urban development pressures. In light of these dynamics, it is essential to systematically advance the future readiness of road infrastructure through comprehensive, multidisciplinary research that includes innovations in road design, pavement and material engineering, the integration of nondestructive testing and smart technologies for real-time assessment, and environmentally responsive solutions for road infrastructures. This Special Issue invites original research articles and comprehensive reviews

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or a comprehensive review article for publication in *Future Transportation*, an international, open access, and peer-reviewed journal that provides an advanced forum for research findings in areas related to the technologies, sustainability, and emerging trends in transportation. *Future Transportation* publishes original research articles, review articles, and communications. I am confident that you will find the journal to be a premier outlet for research fueling the revolution involving electrification, autonomous driving, micro-mobility, and other novel as well shared transportation modes, in addition to the digital infrastructure supporting these aspects.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO, and other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 33.4 days after submission; acceptance to publication is undertaken in 10.6 days (median values for papers published in this journal in the first half of 2025).
