# **Workplans II: Workshop for Planetary Nebula Observations**

Guest Editor:

#### Dr. Toshiya Ueta

Department of Physics and Astronomy, University of Denver, Denver, CO 80208, USA

Deadline for manuscript submissions:

closed (30 October 2020)

### **Message from the Guest Editor**

Dear Colleagues,

This workshop will be the second of the WORKPLANS workshop series we started back in 2016 at the Lorentz Center

(http://www.lorentzcenter.nl/lc/web/2016/786/info.php3? wsid=786&venue=Oort).

The goal of this workshop series is to build up a network of PNe experts to address the main open questions in the field of planetary nebulae research. The specific aims of this workshop are (i) to discuss the most relevant topics to be investigated by the community in the following years, (ii) to set up an excellent network of researchers with complementary expertise to write high-level observing proposals for the most modern telescopes available at present (ALMA, Chandra, SOFIA, VLT, GTC, HST, etc.) to address those topics, and (iii) to develop strategies for future observatories (JWST, ELT, etc.). We plan to achieve these goals by bringing together experts in several subareas of the PNe research field, namely, the analysis and interpretation of PNe observational data, the theoretical modeling of gas and dust emission, the evolution from AGB stars (PNe progenitors) to PNe, and the instrumentation and technical characteristics of the relevant observatories.

### **Editors-in-Chief**

#### Dr. Margo Aller

Department of Astronomy, University of Michigan, Ann Arbor, MI 48109-1042, USA

#### Dr. Jose L. Gómez

Instituto de Astrofísica de Andalucía (IAA-CSIC), Glorieta de la Astronomía S/N, 18008 Granada, Spain

## **Message from the Editorial Board**

*Galaxies* provides an advanced forum for studies related to astronomy, astrophysics, and cosmology, including all of their subfields. Different formats, such as specialized research articles, reviews, communications and technical notes are welcomed. Manuscripts containing original and creative research proposals and ideas are especially appreciated.

We encourage scientists to publish their astronomical observations and theoretical results in as much detail as possible. There is no restriction on the paper length and full experimental and methodological details, as applicable, should be provided. All papers will be peer reviewed promptly. On behalf of the distinguished members of the editorial board, I extend my welcome to all researchers working on these subjects to contribute to *Galaxies* 

#### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, ESCI (Web of Science), Astrophysics Data System, INSPIRE, Inspec, and other databases.

Journal Rank: CiteScore - Q2 (Astronomy and Astrophysics)
