

Special Issue

Recent Advances in Radio Astronomy

Message from the Guest Editor

The last decade has been a golden era for radio astronomy, with new telescopes commissioned, existing facilities upgraded, and future developments planned. This has brought with it new capabilities and opened new areas of research in fields such as survey science, time domain studies, Very-Long-Baseline Interferometry, and spectral line studies. This Special Issue will focus on these new facilities, the science they are enabling, and the opportunities for multi-wavelength studies. Papers related to new instrumentation, new methods and techniques, and new lines of research are particularly welcomed. References: Recent papers published in *Galaxies* that illustrate the journal scope and that are aligned with the themes of this Special Issue include the following: “Key Science Goals for the Next-Generation Event Horizon Telescope” M.D. Johnson et al., 2023, *Galaxies*, 11, 61, “Overview of the Observing System and Initial Scientific Accomplishments of the East Asian VLBI Network (EAVN)” K. Akiyama et al., 2022 *Galaxies*, 10, 113

About the Journal

Message from the Editorial Board

Galaxies provides an advanced forum for studies related to astronomy, astrophysics, and cosmology, including all of their subfields. Different formats, such as specialized research articles, reviews, communications and technical notes are welcomed. Manuscripts containing original and creative research proposals and ideas are especially appreciated.

We encourage scientists to publish their astronomical observations and theoretical results in as much detail as possible. There is no restriction on the paper length and full experimental and methodological details, as applicable, should be provided. All papers will be peer reviewed promptly. On behalf of the distinguished members of the editorial board, I extend my welcome to all researchers working on these subjects to contribute to *Galaxies*.

Editors-in-Chief

Dr. Margo Aller

Department of Astronomy, University of Michigan, Ann Arbor, MI 48109-1042, USA

Dr. Jose L. Gómez

Instituto de Astrofísica de Andalucía (IAA-CSIC), Glorieta de la Astronomía S/N, 18008 Granada, Spain

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), Astrophysics Data System, INSPIRE, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Astronomy and Astrophysics) / CiteScore - Q2 (Astronomy and Astrophysics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 23.4 days after submission; acceptance to publication is undertaken in 4.8 days (median values for papers published in this journal in the first half of 2025).
