

Special Issue

At the Frontier of Multi-Messenger Astrophysics

Message from the Guest Editor

We invite you to share your expertise in this Special Issue dedicated to the exciting field of multi-messenger astrophysics, and we welcome you to contribute original articles or reviews about observational data analyses, perspectives and interpretations, theoretical models, or descriptions about new technological visions concerning designs of new experimental and observational facilities, all of which could help to bring our interpretation of a high-energy universe into a whole new level of understanding.

Guest Editor

Prof. Dr. Athina Meli

College of Science and Technology, North Carolina A&T State University, Greensboro, NC 27411, USA

About the Journal

Message from the Editorial Board

Galaxies provides an advanced forum for studies related to astronomy, astrophysics, and cosmology, including all of their subfields. Different formats, such as specialized research articles, reviews, communications and technical notes are welcomed. Manuscripts containing original and creative research proposals and ideas are especially appreciated.

We encourage scientists to publish their astronomical observations and theoretical results in as much detail as possible. There is no restriction on the paper length and full experimental and methodological details, as applicable, should be provided. All papers will be peer reviewed promptly. On behalf of the distinguished members of the editorial board, I extend my welcome to all researchers working on these subjects to contribute to *Galaxies*.

Editors-in-Chief

Dr. Margo Aller

Department of Astronomy, University of Michigan, Ann Arbor, MI 48109-1042, USA

Dr. Jose L. Gómez

Instituto de Astrofísica de Andalucía (IAA-CSIC), Glorieta de la Astronomía S/N, 18008 Granada, Spain

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), Astrophysics Data System, INSPIRE, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Astronomy and Astrophysics) / CiteScore - Q1 (Astronomy and Astrophysics)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 23.8 days after submission; acceptance to publication is undertaken in 4.9 days (median values for papers published in this journal in the first half of 2026).
