

## Special Issue

# Radio Observations of Galaxy Clusters and Radio Galaxies Within

### Message from the Guest Editor

The current radio astronomical interferometers, such as for instance LOFAR, MeerKAT, uGMRT, ASKAP and VLA, which are paving the way to the SKA, are providing breathtaking advances in our view of radio galaxies and galaxy clusters. It is timely to review our current understanding and open questions of the radio galaxy phenomenon, the relation between radio galaxies and the surrounding environment, and of the origin of diffuse emission in galaxy clusters. The image quality and fidelity of the present observational facilities are unveiling unexpected details which are challenging our knowledge. The aim of this special issue is to review our knowledge in the field, present the new challenges we are facing and discuss the scientific prospects over the next decade, in the light of the capabilities of the SKA.

### Guest Editor

Dr. Tiziana Venturi

INAF, Istituto di Radioastronomia, via Gobetti, 101, 40129 Bologna, Italy

### Deadline for manuscript submissions

closed (28 February 2021)

## About the Journal

### Message from the Editorial Board

*Galaxies* provides an advanced forum for studies related to astronomy, astrophysics, and cosmology, including all of their subfields. Different formats, such as specialized research articles, reviews, communications and technical notes are welcomed. Manuscripts containing original and creative research proposals and ideas are especially appreciated.

We encourage scientists to publish their astronomical observations and theoretical results in as much detail as possible. There is no restriction on the paper length and full experimental and methodological details, as applicable, should be provided. All papers will be peer reviewed promptly. On behalf of the distinguished members of the editorial board, I extend my welcome to all researchers working on these subjects to contribute to *Galaxies*.

---

### Editors-in-Chief

Dr. Margo Aller

Department of Astronomy, University of Michigan, Ann Arbor, MI 48109-1042, USA

Dr. Jose L. Gómez

Instituto de Astrofísica de Andalucía (IAA-CSIC), Glorieta de la Astronomía S/N, 18008 Granada, Spain

---

### Author Benefits

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), Astrophysics Data System, INSPIRE, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Astronomy and Astrophysics) / CiteScore - Q2 (Astronomy and Astrophysics)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 23.4 days after submission; acceptance to publication is undertaken in 4.8 days (median values for papers published in this journal in the first half of 2025).
