Deadline for manuscript submissions:

closed (15 December 2020)

Message from the Guest Editors

Dear Colleagues,

Communication can have a large impact on behavior in many games, and content analysis of communication in experiments is a powerful tool for understanding strategic thinking. This Special Issue focuses on experimental studies of communication in games. Potential topics include, but are not limited to, sender-receiver games, the impact of pre-play communication in communication in group identity tasks, and content analysis of communication. Any type of communication may be considered, including costly or costless, limited or free-form, and electronic or face-to-face. We welcome submissions using laboratory experiments. field experiments, or meta-analyses of experimental results.
