# Special Issue

# Game-Theoretical Analysis of the Division of Labor and Trade Conflict

# Message from the Guest Editor

Human beings engage in two major activities: production and appropriation of others' output. The international division of labor and war (military or economic) may well be regarded, respectively, as the prototypes of international cooperation and conflict. The surplus arising from trade, which benefits both sides of voluntary exchanges as usual, constitutes one major part of the opportunity costs of war. Nonetheless, at times, it also strengthens the incentive for one side to launch a trade war (in the form of export subsidies or tariffs, for instance), or even a military conflict. The reason is that the extension of the market by trade, from the perception of the economy with a trade deficit, brings about unbalanced benefits, and even unfairness, in favor of the side with a trade surplus. As such, more trade, globalization for instance, does not necessarily lead to even more cooperation, even though trade is a positive-sum game, while trade war is not. This stands as one major challenge that we face now and will likely continue to confront in quite a while to come.

# Message from the Editorial Board

#### **Editors-in-Chief**

Prof. Dr. Ulrich Berger

WU Vienna, Department of Economics, Welthandelsplatz 1, 1020 Wien, Austria

Prof. Dr. Kjell Hausken

Faculty of Science and Technology, University of Stavanger, 4036 Stavanger, Norway

### **Author Benefits**

# **High Visibility:**

indexed within Scopus, ESCI (Web of Science), MathSciNet, zbMATH, RePEc, EconLit, EconBiz, and other databases.

# **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 32.6 days after submission; acceptance to publication is undertaken in 6.9 days (median values for papers published in this journal in the first half of 2025).

### **Recognition of Reviewers:**

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
