Special Issue

Fairness in Non-Cooperative Strategic Interactions

Message from the Guest Editors

In this Special Issue, we aim to direct ther reader's attention toward fairness in non-cooperative human interactions; moreover, we intend to present a comprehensive review of current models and experimental studies on fairness in strategic interactions alongside new, unpublished models and results. We welcome original and review papers pertaining to the following:

- Are humans fair by their nature, or is fairness an emergent trait cultivated by education, social norms, and religious ethics?
- To what extent are fairness and cooperative perceptions and behaviors correlated?
- Theoretical and simulation models pertaining to the possibility of the evolution of fair behavior in small and large groups.
- Individual and societal differences in fairness perceptions and behaviors.
- The neurophysiological correlates of fair perception and behavior.
