

Special Issue

Game Theory Perspectives in Sociology

Message from the Guest Editor

This special issue focuses on the formulation and/or application of game theoretical models that account endogenously for the formation of social preferences and/or beliefs, prior to and/or during the interactions being modeled. The models should formalize a psychological and/or evolutionary process through which formation occurs and reference the social science literature(s) from which they draw inspiration. The models should also identify important ways in which the modeled preferences and/or beliefs influence strategies in games. Empirical tests of existing or new models in this field are also welcome. Empirical tests may include, but are not limited to, field or lab experiments; analysis of structural, survey and/or event data; online network and content analysis; and/or computer simulation.

Guest Editor

Prof. Dr. Sun-Ki Chai

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science),
MathSciNet, zbMATH, RePEc, EconLit, EconBiz, and other
databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 35.8 days after
submission; acceptance to publication is undertaken in 6.7
days (median values for papers published in this journal in
the second half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review
reports receive vouchers entitling them to a discount on
the APC of their next publication in any MDPI journal, in
appreciation of the work done.
