Special Issue

Applications of Game Theory to Industrial Organization

Message from the Guest Editors

This Special Issue aims to collect original, high-quality applications of game-theoretic methods to the broad field of industrial organization. A non-exhaustive list of these methods includes: dynamic and Stackelberg games, entry games, models with myopic, adaptive and farsighted players, behavioral games, cooperative and coalition formation games and network and information sharing games. Applications include, but are not limited to, collusion, horizontal and vertical differentiation, innovation, two-sided markets, markets with asymmetric information, vertical industries and monopolistic competition.

Keywords   non-cooperative games
   cooperative games
   imperfect competition
   asymmetric information
   vertical markets
   collusion
   differentiation
   innovation
   two-sided markets

About the Journal

Message from the Editorial Board

Editors-in-Chief

Prof. Dr. Ulrich Berger
WU Vienna, Department of Economics, Welthandelsplatz 1, 1020 Wien, Austria

Prof. Dr. Kjell Hausken
Faculty of Science and Technology, University of Stavanger, 4036 Stavanger, Norway

Author Benefits

High Visibility:
indexed within Scopus, ESCI (Web of Science), MathSciNet, zbMATH, RePEc, EconLit, EconBiz, and other databases.

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 32.6 days after submission; acceptance to publication is undertaken in 6.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:
reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
