## Behavioral Coalition Formation: Theory and Experiments

## Message from the Guest Editors

Both cooperative game theory and non-cooperative game theory offer a wide variety of approaches to the question of coalition formation. Over the last few decades, coalition formation theories have been applied to many important economic issues such as the formation of economic unions, the governance of global public goods and the stability of political parties. However, empirical evidence on the coexistence of small and large groups, instead of a grand Paretosuperior coalition, challenged the theoretical framework. Advances in cooperative and in non-cooperative game theory have provided new insights in coalition formation with heterogeneous groups at equilibrium. Yet many aspects of the process of coalition formation are not well understood. Progress in experimental design and behavioral modelling can shed new light on the roots of the formation and stability of coalitions. In this Special Issue, we wish to gather recent contributions, either theoretical or experimental, on the issue of coalition formation with a special focus on behavioral approaches.

## About the Journal

## Message from the Editorial Board

### **Editors-in-Chief**

Prof. Dr. Ulrich Berger WU Vienna, Department of Economics, Welthandelsplatz 1, 1020 Wien, Austria

Prof. Dr. Kjell Hausken Faculty of Science and Technology, University of Stavanger, 4036 Stavanger, Norway

## **Author Benefits**

### **High Visibility:**

indexed within Scopus, ESCI (Web of Science), MathSciNet, zbMATH, RePEc, EconLit, EconBiz, and other databases.

### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 32.6 days after submission; acceptance to publication is undertaken in 6.9 days (median values for papers published in this journal in the first half of 2025).

#### **Recognition of Reviewers:**

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
