

Special Issue

Behavioral Game Theory

Message from the Guest Editor

Humans display pervasive and systematic departures from rationality, which cannot be accounted for by the traditional Nash equilibrium prediction or its various refinements. This has led to the growth of behavioral game theory, which acknowledges bounded rationality, learning, and social preferences. This special issue of *Games* brings together articles about how people actually make strategic decisions in game theoretic situations. We are looking for both theory and experiments, and especially for research that ties them together. We are particularly interested in the process of strategic decision making, and in research that models or observes response time, attention during deliberation, and/or stochastic choice in games.

About the Journal

Message from the Editorial Board

Editors-in-Chief

Prof. Dr. Ulrich Berger

WU Vienna, Department of Economics, Welthandelsplatz 1, 1020 Wien,
Austria

Prof. Dr. Kjell Hausken

Faculty of Science and Technology, University of Stavanger, 4036
Stavanger, Norway

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science),
MathSciNet, zbMATH, RePEc, EconLit, EconBiz, and other
databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 35.8 days after
submission; acceptance to publication is undertaken in 6.7
days (median values for papers published in this journal in
the second half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review
reports receive vouchers entitling them to a discount on
the APC of their next publication in any MDPI journal, in
appreciation of the work done.
