Special Issue Optimal Control Theory

Message from the Guest Editor

This Special Issue will gather research regarding research focused on the development of novel analytical and numerical methods for solutions of optimal control or of dynamic optimization problems, including changing and incomplete information about the investigated objects, application to medicine, infectious diseases, and economic or physical phenomena. Investigations of new classes of optimization problems, optimal control of nonlinear systems, as well as the task of reconstructing input signals are invited. For example, we are interested in papers that develop new algorithms to implement some of the principles of regularization using constructive iterative procedures or in papers that create an optimal control model that can accumulate experience and improve its work on this basis or the so-called learning optimal control system. The applied papers focused on control models of economic, physical, medical (i.e., infectious diseases) or environmental processes or resource allocation on the specified time interval or on the infinite planning horizon would be of special interest.

About the Journal

Message from the Editorial Board

Editors-in-Chief

Prof. Dr. Ulrich Berger WU Vienna, Department of Economics, Welthandelsplatz 1, 1020 Wien, Austria

Prof. Dr. Kjell Hausken Faculty of Science and Technology, University of Stavanger, 4036 Stavanger, Norway

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), MathSciNet, zbMATH, RePEc, EconLit, EconBiz, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 32.6 days after submission; acceptance to publication is undertaken in 6.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
