

# Special Issue

## Cooperation, Innovation and Safeguarding of the Environment

### Message from the Guest Editor

The global and international dimension of environmental problems requires multiple and heterogeneous methods of analysis appropriate to the several implications of the environment. Models of game theory applied to this problem must take into account that the agents can build their strategies combining cooperation and/or innovation aspects.

This Special Issue aims to bring together researchers from various disciplines (including but not limited to economics and applied mathematics) to collect a series of papers that will contribute toward theoretical, empirical and experimental approaches to explain how all the actions for efficient international environmental regulation can be encouraged in order to reduce pollution and to implement investments in new technologies. The Special Issue is particularly devoted to gathering some new game theoretic solution concepts and correlated equilibrium that face the environmental problems in an original way and interesting contributions that detail novel instruments able to encourage more efficient policy decisions.

## About the Journal

### Message from the Editorial Board

---

#### Editors-in-Chief

Prof. Dr. Ulrich Berger

WU Vienna, Department of Economics, Welthandelsplatz 1, 1020 Wien,  
Austria

Prof. Dr. Kjell Hausken

Faculty of Science and Technology, University of Stavanger, 4036  
Stavanger, Norway

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, ESCI (Web of Science),  
MathSciNet, zbMATH, RePEc, EconLit, EconBiz, and other  
databases.

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 32.6 days after  
submission; acceptance to publication is undertaken in 6.9  
days (median values for papers published in this journal in  
the first half of 2025).

##### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review  
reports receive vouchers entitling them to a discount on  
the APC of their next publication in any MDPI journal, in  
appreciation of the work done.
