

Special Issue

Game Theory and Risk Analysis

Message from the Guest Editor

For this Special Issue, we expect high-quality original research papers that provide theoretical and/or practical applications within *Games*' aims and scope. In addition to strong game theoretic content, the focus on risk analysis encompasses, for example, security, safety, cyber risk, financial risk, reliability, digital currencies, cryptocurrencies and terrorism. Submitted papers will be peer reviewed in the same manner as any other submission to *Games*, using the online submission system.
