

Special Issue

Dictator Games

Message from the Guest Editors

For the past three decades, the dictator game has emerged as a simple metric or baseline for studying human behavior, including generosity, fairness, reciprocity, social preferences, social norms, moral costs, charitable giving, contributions to public goods, market design, institutions, and gender differences, among many others. This Special Issue is looking for submissions that make novel contributions in this broad program by using dictator games. We welcome submissions using a variety of methods to study behavior in dictator games, including laboratory experiments, field experiments, theoretical analysis, and meta-analysis.

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science),
MathSciNet, zbMATH, RePEc, EconLit, EconBiz, and other
databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 32.6 days after
submission; acceptance to publication is undertaken in 6.9
days (median values for papers published in this journal in
the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review
reports receive vouchers entitling them to a discount on
the APC of their next publication in any MDPI journal, in
appreciation of the work done.
