

Special Issue

Game Theory with Applications to Economics

Message from the Guest Editor

Game theory, which deals with strategic interactions among multiple decision makers in a context with predefined rules and outcomes, is a major research branch in economic theory. It is noteworthy that game theory is not only interesting from a theoretical point of view, but is also an important tool to understand the real behavior of society. Furthermore, there has also recently been an almost exponentially growing interest in the application of game theory concepts and tools to research on control, multiagent systems, and networks due to the irruption and attractiveness of artificial intelligence. This Special Issue aims to further the state-of-the-art. We encourage the submission of papers underscoring recent advances in theory and application of game theory to economics. We are interested in new cutting-edge applications of game theory, including behavioral and experimental economic applications. A few topic areas are highlighted below: Industrial organization; Bargaining; Networks; Mechanism design Auctions; Voting theory; Experimental economics; Political economy; Behavioral economics; Experiments; Artificial intelligence; Computer science.

About the Journal

Message from the Editorial Board

Editors-in-Chief

Prof. Dr. Ulrich Berger

WU Vienna, Department of Economics, Welthandelsplatz 1, 1020 Wien,
Austria

Prof. Dr. Kjell Hausken

Faculty of Science and Technology, University of Stavanger, 4036
Stavanger, Norway

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science),
MathSciNet, zbMATH, RePEc, EconLit, EconBiz, and other
databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 35.8 days after
submission; acceptance to publication is undertaken in 6.7
days (median values for papers published in this journal in
the second half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review
reports receive vouchers entitling them to a discount on
the APC of their next publication in any MDPI journal, in
appreciation of the work done.
