

Special Issue

Economic Applications of Game Theory

Message from the Guest Editor

This Special Issues of *Games*, titled "Economic Applications of Game Theory", will focus on applications of game theory across areas of economics. We will be primarily interested in research focusing on the main concepts of game theory, such as the Nash equilibrium, subgame perfect equilibrium, Perfect Bayesian equilibrium, Sequential equilibrium, and other related concepts that are used to analyze important issues in economics. In particular, we encourage research submissions on economic issues and models in which players possess private information and make strategic decisions. Keywords

- Nash equilibrium
- perfect Bayesian equilibrium
- sequential equilibrium
- subgame perfect equilibrium
- Markov perfect equilibrium
- economics and game theory
- folk theorem
- repeated games
- strategic behavior
- oligopoly

Guest Editor

Stavanger, Norway

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science),
MathSciNet, zbMATH, RePEc, EconLit, EconBiz, and other
databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 32.6 days after
submission; acceptance to publication is undertaken in 6.9
days (median values for papers published in this journal in
the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review
reports receive vouchers entitling them to a discount on
the APC of their next publication in any MDPI journal, in
appreciation of the work done.
