

Special Issue

Psychological Aspects of Strategic Choice

Message from the Guest Editors

This special issue of *GAMES* is devoted to investigations of psychological factors affecting strategy choices in social dilemmas and other games. Ever since psychologists began studying experimental games in the 1950s, it has been clear that human decision makers do not follow the prescriptions of normative game theory. From the late 1980s, behavioral game theory has reinforced this early finding and has contributed numerous hypotheses about the psychological processes underlying human strategic choice. Understanding and explaining strategic choice are among the most important problems in the behavioral and social sciences. Clearly written manuscripts reporting new evidence or theory are potentially suitable for the special issue. The keywords below are merely indicative.

About the Journal

Message from the Editorial Board

Editors-in-Chief

Prof. Dr. Ulrich Berger

WU Vienna, Department of Economics, Welthandelsplatz 1, 1020 Wien,
Austria

Prof. Dr. Kjell Hausken

Faculty of Science and Technology, University of Stavanger, 4036
Stavanger, Norway

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science),
MathSciNet, zbMATH, RePEc, EconLit, EconBiz, and other
databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 32.6 days after
submission; acceptance to publication is undertaken in 6.9
days (median values for papers published in this journal in
the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review
reports receive vouchers entitling them to a discount on
the APC of their next publication in any MDPI journal, in
appreciation of the work done.
