Special Issue

Wireless Networks and Games Theory

Message from the Guest Editor

Game Theory is a fascinating tool with which to analyze the potential conflict of interest. It has recently gained momentum to boost the utilization of scarce radio resources in a distributed fashion. Game players typically involve mobile nodes. User Equipment (UE). primary and secondary cognitive radios, etc. Utility functions need to be defined to help players assess their payoff from choosing strategy. Additionally, recent innovations in wireless communications, fundamentally rely on cooperation of players. Nonetheless, this cannot be taken for granted, since players naturally seek to maximize their own payoff. Proper mechanisms are needed to foster cooperation and discourage selfish behavior. Finally, coalitional games can be employed in incidents in which players are allowed to form coalitions and, when profitable, pool their resources and improve their individual and group payoff. The topics for this Special Issue include, but are not limited to: Cooperative Communications, Network Coding, Self-Organizing Network, Radio Resource Allocation, Energy Efficiency, Spectral Efficiency, Trust Management, Cognitive Radio, and Cybersecurity Game.

About the Journal

Message from the Editorial Board

Editors-in-Chief

Prof. Dr. Ulrich Berger WU Vienna, Department of Economics, Welthandelsplatz 1, 1020 Wien, Austria

Prof. Dr. Kjell Hausken Faculty of Science and Technology, University of Stavanger, 4036 Stavanger, Norway

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), MathSciNet, zbMATH, RePEc, EconLit, EconBiz, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 32.6 days after submission; acceptance to publication is undertaken in 6.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
