Special Issue

Cooperation, Trust, and Reciprocity

Message from the Guest Editors

Modeling and understanding the evolution of cooperation have been major challenges during the last decades. Thus, we are excited to invite you to submit an original research paper for a Special Issue of GAMES. The Special Issue will be devoted to all aspects of human cooperation, including direct and indirect reciprocity, reputation, trust, and the evolutionary dynamics of cooperation. We believe that this will be a great opportunity to promote exciting work in this field. Martin Nowak and Christian Hilbe

Author Benefits

High Visibility:
indexed within Scopus, ESCI (Web of Science), MathSciNet, zbMATH, RePEc, EconLit, EconBiz, and other databases.

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 32.6 days after submission; acceptance to publication is undertaken in 6.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:
reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
