

Special Issue

Games and Psychology

Message from the Guest Editor

Recent interdisciplinary work has attempted to explain how people behave in game theoretic scenarios in terms of fundamental psychological and neural mechanisms such as reward processing, attention, emotion, and personality measures, amongst others. This type of work can deliver important insights, from demonstrating that complex interactive behavior can be understood in terms of basic processes to explaining the variability of behavior by individual differences in cognitive and social abilities as well as variation in genes and pharmacology. This Special Issue seeks to better understand the link between psychological processes and behavior in interactive settings. We welcome all contributions which are interested in exploring the psychological processes, defined broadly, underlying interactive decision-making. Alan Sanfey

About the Journal

Message from the Editorial Board

Editors-in-Chief

Prof. Dr. Ulrich Berger

WU Vienna, Department of Economics, Welthandelsplatz 1, 1020 Wien,
Austria

Prof. Dr. Kjell Hausken

Faculty of Science and Technology, University of Stavanger, 4036
Stavanger, Norway

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science),
MathSciNet, zbMATH, RePEc, EconLit, EconBiz, and other
databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 32.6 days after
submission; acceptance to publication is undertaken in 6.9
days (median values for papers published in this journal in
the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review
reports receive vouchers entitling them to a discount on
the APC of their next publication in any MDPI journal, in
appreciation of the work done.
