

Special Issue

Games and Industrial Organization

Message from the Guest Editor

This Special Issue of *Games* is dedicated to the analysis of strategic behavior in the field of industrial organization. In addition to the traditional topics of interest in this discipline, which acted as a Trojan horse in the adoption of game theory by the modern social sciences as a whole, potential topics of interest include, but are by no means limited to, the relationship between aggregate innovation and industry structure, two-sided markets, platforms, and price algorithms. Submissions dealing with the impact of vertical or horizontal mergers on technical progress, the analysis of the intertemporal evolution of an industry using Markovian tools, potential games and experimental evidence—to mention just a few other possibilities—are also welcome. The same applies to well-motivated reviews of ongoing debates.

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science),
MathSciNet, zbMATH, RePEc, EconLit, EconBiz, and other
databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 32.6 days after
submission; acceptance to publication is undertaken in 6.9
days (median values for papers published in this journal in
the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review
reports receive vouchers entitling them to a discount on
the APC of their next publication in any MDPI journal, in
appreciation of the work done.
