

Special Issue

Logistic Games

Message from the Guest Editors

In a dictionary “logistic” is defined as the “management of inventories and groups of people in motion and at a rest”. Adding “games” as a suffix to “logistics” frames questions of how can the participants (people, inventories, warehouses, etc.) fairly account for their logistic outcomes. This Special Issue is about cooperative games and competitive games instantiated in real life and addresses questions, such as what should be the cost to a household when dividing the cost of a postman’s delivery route between the route’s beneficiaries? Would a remote gas station be allocated a higher cost for its gasoline replenishment than a gas station in a close central location? What is a fair taxation on a congested toll road? The lower the toll the higher the traffic congestion and it takes longer to reach the destination. What are the roles of the players in these games? In this Special Issue we intend to take stock of what has been achieved thus far and what questions remain unanswered.

About the Journal

Message from the Editorial Board

Editors-in-Chief

Prof. Dr. Ulrich Berger

WU Vienna, Department of Economics, Welthandelsplatz 1, 1020 Wien,
Austria

Prof. Dr. Kjell Hausken

Faculty of Science and Technology, University of Stavanger, 4036
Stavanger, Norway

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science),
MathSciNet, zbMATH, RePEc, EconLit, EconBiz, and other
databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 32.6 days after
submission; acceptance to publication is undertaken in 6.9
days (median values for papers published in this journal in
the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review
reports receive vouchers entitling them to a discount on
the APC of their next publication in any MDPI journal, in
appreciation of the work done.
