

# Special Issue

## Applications of Game Theory to Networks

### Message from the Guest Editors

In recent years, we have witnessed a growing interest in the use of concepts, solutions and apparatus from game theory in the network context. The applications include such diverse areas as centrality analysis, community detection, link prediction, network elicitation, cost-sharing, security, competitive contagion, conflict in networks, network formation and network design. In this call, we would like to invite original research papers to a Special Issue of Games on advances and applications of game theory to networks. We believe this Special Issue will be a valuable addition to the literature. We envisage a broad scope for this Special Issue, and we will consider all submissions that report on the use of game theoretic concepts to network analysis. Please consider keywords below as merely indicative.

## About the Journal

### Message from the Editorial Board

---

#### Editors-in-Chief

Prof. Dr. Ulrich Berger

WU Vienna, Department of Economics, Welthandelsplatz 1, 1020 Wien,  
Austria

Prof. Dr. Kjell Hausken

Faculty of Science and Technology, University of Stavanger, 4036  
Stavanger, Norway

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, ESCI (Web of Science),  
MathSciNet, zbMATH, RePEc, EconLit, EconBiz, and other  
databases.

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 32.6 days after  
submission; acceptance to publication is undertaken in 6.9  
days (median values for papers published in this journal in  
the first half of 2025).

##### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review  
reports receive vouchers entitling them to a discount on  
the APC of their next publication in any MDPI journal, in  
appreciation of the work done.
