Special Issue

Bio-Energy: Biogas, Biomethane and Green-Hydrogen

Message from the Guest Editor

Bio-energy, derived from organic materials such as agricultural residues, organic waste, and dedicated energy crops, plays a crucial role in transitioning to a sustainable and low-carbon energy future. Biogas, biomethane, and green hydrogen are key components of bio-energy that hold significant promise in meeting energy demands while reducing greenhouse gas emissions. This Special Issue aims to provide a platform to share the latest developments in biogas production, biomethane upgrading, green hydrogen applications, and integrated energy systems. Both review and research articles are welcome.

Guest Editor

Prof. Dr. João Fernando Pereira Gomes
Department of Chemical Engineering (ADEQ), Instituto Superior de Engenharia de Lisboa (ISEL), R. Conselheiro Emídio Navarro, 1959-007 Lisboa, Portugal

Deadline for manuscript submissions

30 November 2025

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Ben J. Anthony
1. Department of Chemical and Biological Engineering, University of Ottawa, Ottawa, ON K1N 6N5, Canada
2. Energy and Environmental Chemistry Centre for Bioenergy & Resource Management, Cranfield University, Bedford MK43 0AL, UK

Author Benefits

Open Access:
free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:
indexed within Scopus, EBSCO, ProQuest and other databases.

Journal Rank:
CiteScore - Q2 (Environmental Science (miscellaneous))
